

# FUTURE TENSE VARIATION PATTERNS IN SAIPANESE ENGLISH AND L1 VARIETIES

Workshop Leuven: 04.04.2016

*Probabilistic variation across dialects and varieties*

*u<sup>b</sup>*

- New emerging English variety
- North-western Pacific Ocean
- Grammaticalization of *going to*
- Different usage of the future tense in the L1

# Contents

1. Overview of the project and data
2. The future tense
3. Results – Linguistic factors
4. Results – Social factors
5. Conclusion

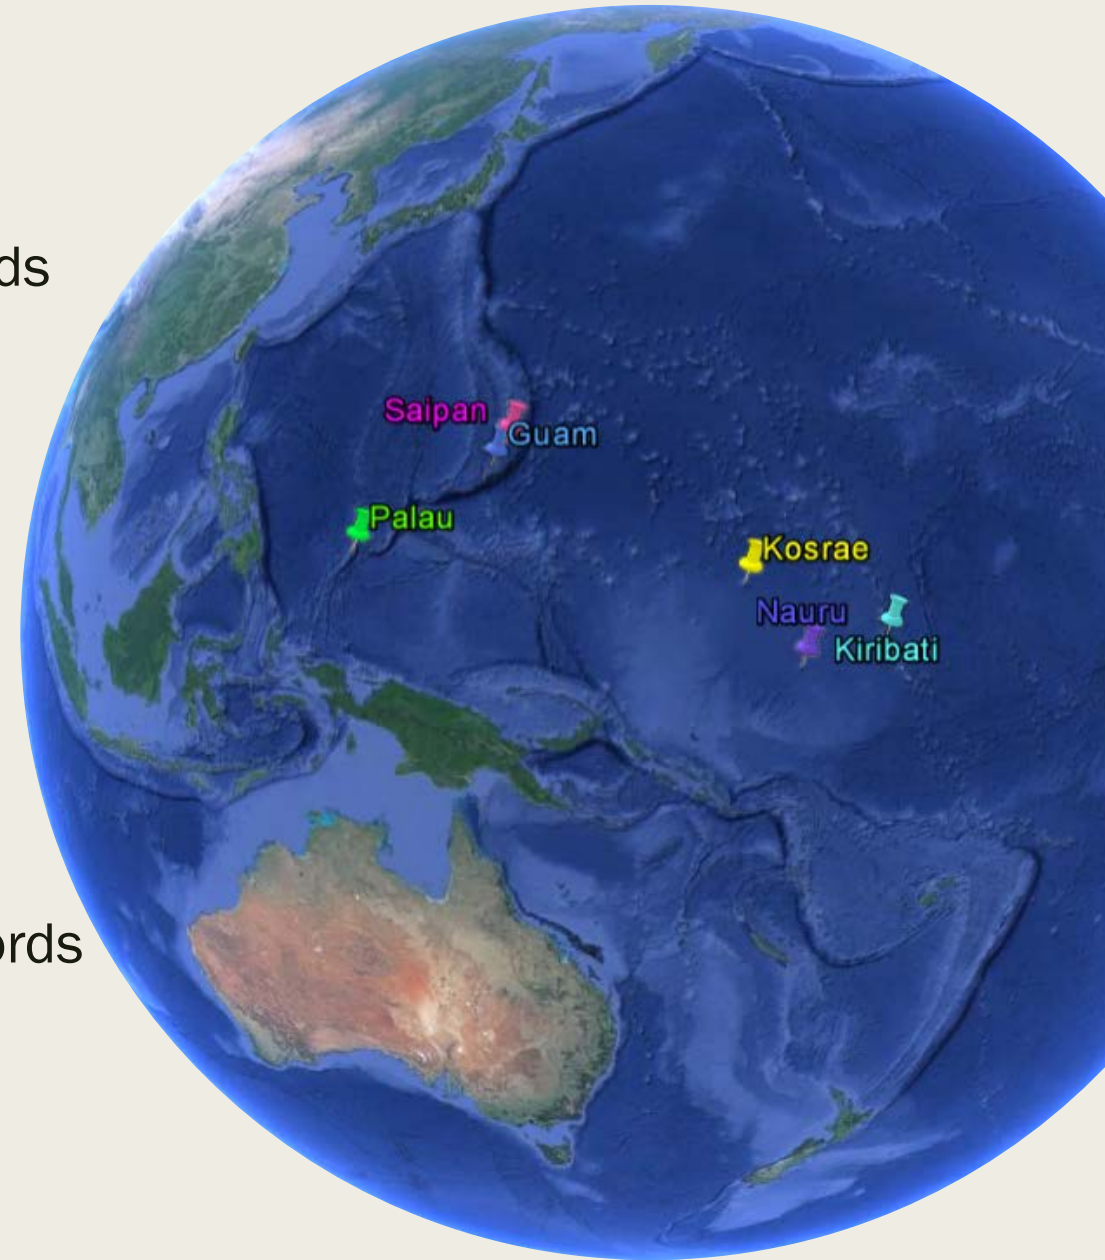

# 1. OVERVIEW OF THE PROJECT AND DATA

# The Micronesia Project

- Different and complex historical backgrounds
  - *different colonisers*
  - *different colonisation periods*
- Different developments
  - *social*
  - *political*
  - *economic*
  - *linguistic*
- Different futures
- The corpus exists of just over 1.5 million words (without Guam)

# Commonwealth of the Northern Mariana Islands (CNMI)

CNMI (14 Islands)

- Land: 475.3 km<sup>2</sup>
- Population (2010 Census): 53'883

# Saipan

- Land: 115.4 km<sup>2</sup> (= Dublin)
- Population (2010 Census): 48'220

# General Information

- Colonized by Spain, Germany, Japan and the USA
- 1978: Constitution of the Commonwealth of the Northern Mariana Islands

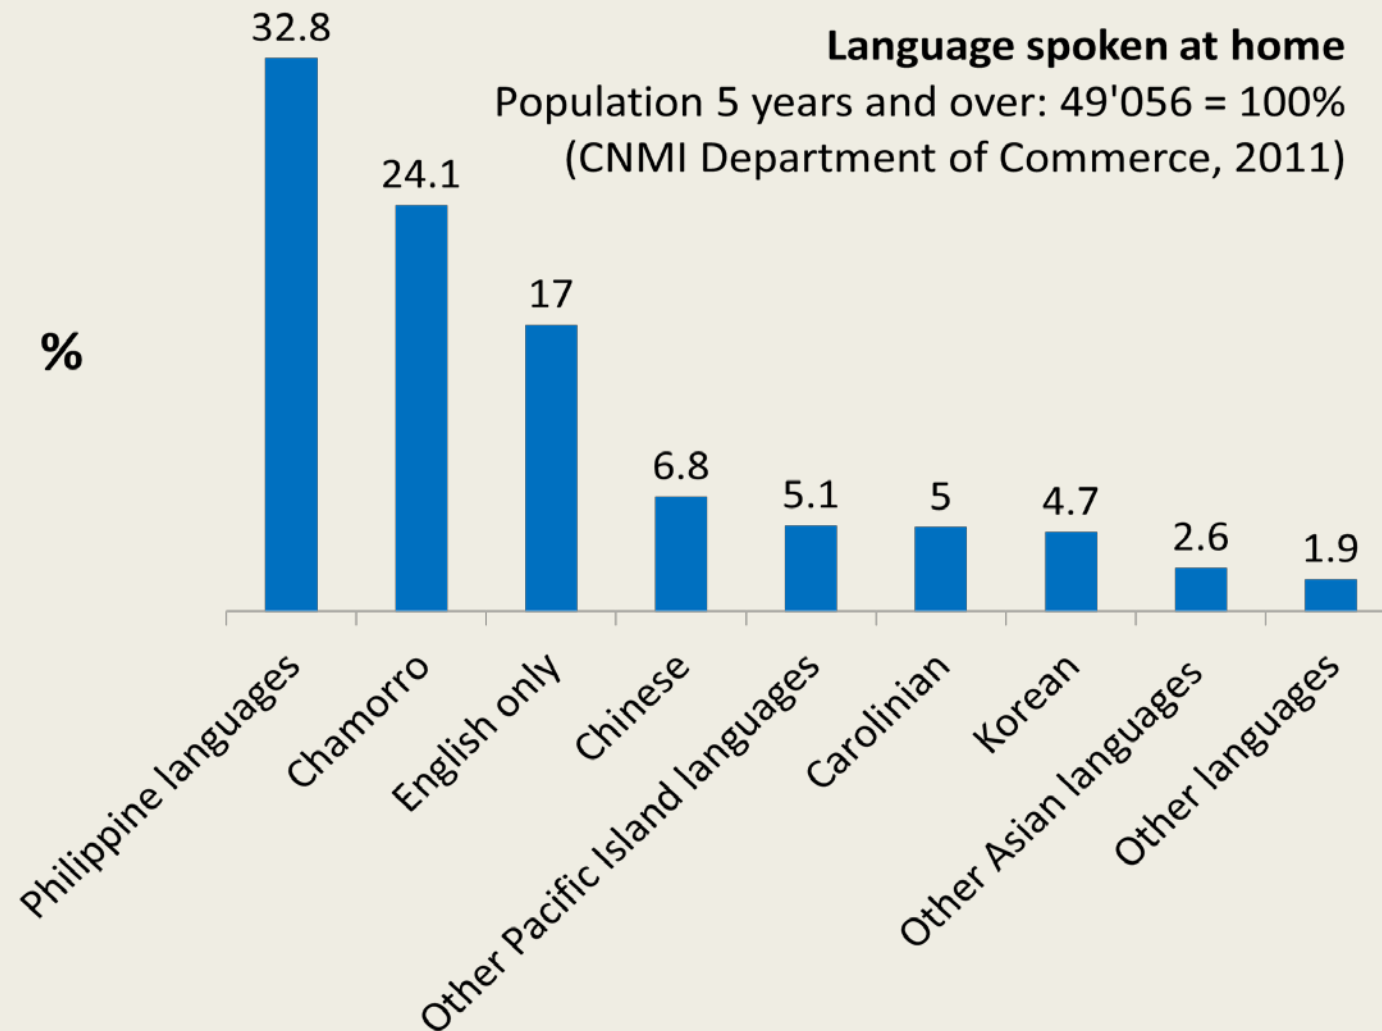

CNMI Department of Commerce (2011)

- Indigenous people: Chamorro (22%) and Saipan Carolinians (5%)
- Multicultural Saipan (51% Asians, 34% Pacific Islanders, 2% White, 13% residents are of two or more ethnic origins or races)

# Use of language in the CNMI

## Frequency of English Usage

- English only: 17%
- Speak other languages (83%)
  - Less frequently than English: 15%
  - Equally often as English: 27%
  - More frequently than English: 39%
  - Does not speak English: 2%

# ELF

# Saipan Data

- **Hypothesis:** Saipan presents an interesting transitional phase of English becoming a first language with local 'island' features.
- **Research Question:** Does Saipanese English assimilate towards L1 varieties and to which extent do local factors influence their use of English?
- recorded informal conversations with 95 indigenous Chamorro and Saipan Carolinians ranging in age from 12 to 79
- Approx. 377'000 words

## 2. THE FUTURE TENSE

# Historical perspective on developments of future temporal reference forms (Tagliamonte, Durham, & Smith, 2014, p. 78)

Old English	Sixteenth century	Seventeenth century	Modern English
<i>shall:</i> present obligation	<i>shall:</i> simple future	<i>shall:</i> 1st p. future	<i>shall:</i> <ul style="list-style-type: none"> <li>●restricted</li> <li>●formulaic</li> <li>●infrequent</li> </ul>
<i>will:</i> <ul style="list-style-type: none"> <li>●volition</li> <li>●willingness</li> </ul>	<i>will:</i> modal future	<i>will:</i> <ul style="list-style-type: none"> <li>●2nd+3rd pers. future</li> <li>●prescriptive rules of usage</li> </ul>	<i>will:</i> simple future <i>be going to:</i> ?? future
	<i>be going to:</i> actual motion	<i>be going to:</i> <ul style="list-style-type: none"> <li>●immediate or impending</li> <li>●correlated with motion verbs</li> </ul>	

# Future tense: Dependent variable

- *Will*
  - *will*
  - *'ll*
- *Be going to*
  - *going to*
  - *be gonna*
  - *gonna*
- *Present futurate*
  - *present simple*
  - *present progressive*
- *(Shall)*
- *(About to)*

# Extra-linguistic variables

- Sex
- Age
- Ethnicity
- Education type
- Occupation type
- Mobility

# Intra-linguistic variables

- Clause type
- Sentence type
- Grammatical person
- Animacy of subject
- Semantic class of verb
- Temporal adverbials
- Proximity

### 3. RESULTS – LINGUISTIC FACTORS

# The Future Tense overall

## 20 speakers

- 10 Chamorro
- 10 Saipan Carolinians
- 12 people aged 20-25
- 8 people aged 37-48
- 625 Tokens

# Comparison of rates of *be going to* in Saipanese English with L1 varieties

Data	%	N	Reference
10 communities across the UK	22	4,764	Tagliamonte et al. (2014, p. 83)
Guysborough Village	27	258	Poplack and Tagliamonte (1999, p. 326)
Corpus of Spoken Professional American English (CSPAE)	31	18,744	Szmrecsanyi (2003, p. 302)
Ottawa	34	408	Poplack and Tagliamonte (1999, p. 326)
<b>Saipan: Carolinian</b>	<b>36</b>	<b>258</b>	
<b>Saipan overall</b>	<b>38</b>	<b>625</b>	
North Preston	38	1,016	Poplack and Tagliamonte (1999, p. 326)
<b>Saipan: Chamorro</b>	<b>40</b>	<b>367</b>	
Guysborough Enclave	40	1,193	Poplack and Tagliamonte (1999, p. 326)
Quebec	42	3,337	Cacoullos and Walker (2009, p. 328)
Toronto			Tagliamonte (2006, p. 314)
Santa Barbara Corpus of Spoken American English (CSAE)	47	496	Szmrecsanyi (2003, p. 302)
Samaná	50	453	Poplack and Tagliamonte (1999, p. 326)

<i>going to</i>			
Input prob. = 0.65			
Total N = 460			
Deviance = 513.645		52	238
	FW	%	N
<b><i>Proximity</i></b>			
Immediate	<b>.66</b>	74	70
Non-immediate	<b>.47</b>	53	120
No reference	<b>.37</b>	46	270
<i>Range</i>	<i>29</i>		
<b><i>Clause Type</i></b>			
Subordinate	<b>.62</b>	68	104
Main	<b>.38</b>	47	356
<i>Range</i>	<i>24</i>		
<b><i>Grammatical Person and Animacy of Subject</i></b>			
3rd person inanimate	<b>.59</b>	66	79
3rd and 2nd person animate	<b>.53</b>	50	222
1st person	.38	47	159
<i>Range</i>	<i>21</i>		
<b><i>Semantic Class of Verb</i></b>			
Verb of motion	.55	61	43
Other verb	.45	51	417

Factors contributing to the choice of future *going to* (vs. *will*) in Saipanese English.

### *Futurate Present*

Input prob.= 0.37

Total N = 625

Deviance = 558.039

	FW	%	N
<b><i>Semantic Class of Verb</i></b>			
Verb of motion	.65	50	85
Other verb	.36	23	540
<i>Range</i>	.30		
<b><i>Proximity</i></b>			
Immediate	.59	40	116
Non-immediate	.57	40	199
No reference	.34	13	310
<i>Range</i>	.25		
<b><i>Temporal Adverbial</i></b>			
Specific	.62	53	142
Nonspecific	.48	24	41
No adverbial	.40	18	442
<i>Range</i>	.22		
<b><i>Sentence Type</i></b>			
Interrogative	.65	41	42
Declarative	.44	26	542
Negative	.41	17	41
<b><i>Grammatical Person and Animacy of Subject</i></b>			
1st person	.53	32	234
3rd person inanimate	.48	26	107
3rd and 2nd person animate	.47	22	284

Factors contributing to the choice of Futurate Present (simple Present (N = 106) and Present Progressive (N = 59) vs. *will* and *going to*) in Saipanese English.

# Predictions for stages of grammaticalization of *be going to* (Tagliamonte, Durham, & Smith, 2014, p. 89)

	Early stage	Late stage	Change
Sentence type	Interrogatives and negatives highly favour; interrogative > negative	Interrogatives and negatives highly favour; interrogative > negative	No change
Clause type	Subordinate clauses favour	Subordinate clauses favour	Expansion into main clauses
Proximity	Non-immediate favours over proximate	Proximate favours	Proximity effect develops
Animacy	Animates favour	Animate = Inanimate	Expansion into inanimate contexts
Grammatical person	Non-first favours	Non-first favours	Strengthening of 2nd/3rd person for <i>going to</i> (1st person favours 'll)

# Concluding

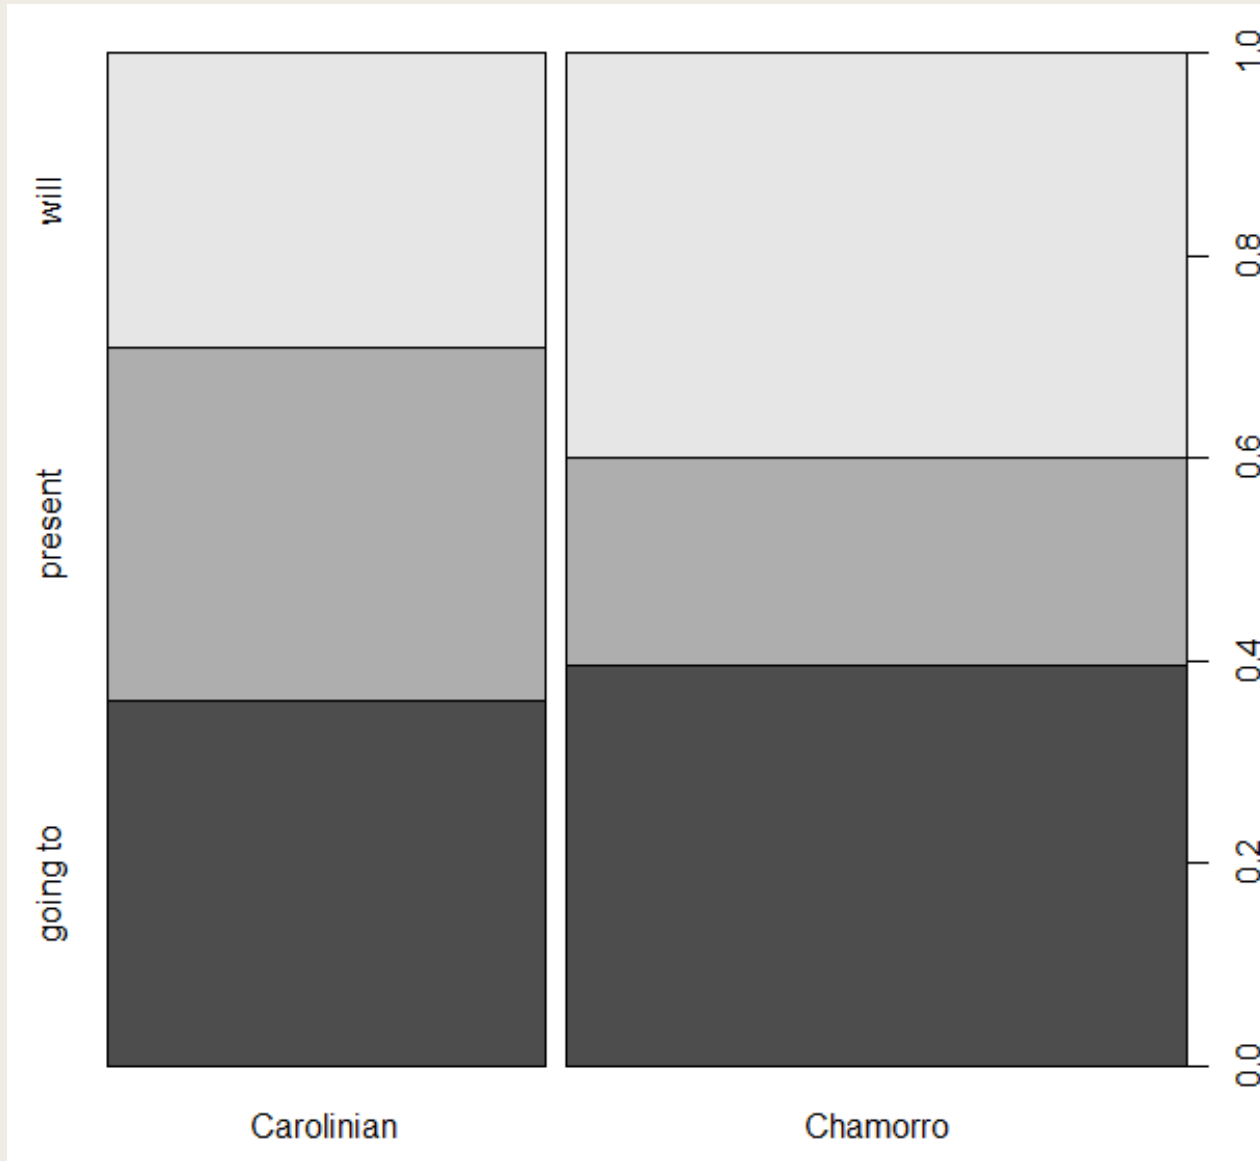

The trajectory of the grammaticalization of the future tense in Saipanese English, thus, follows a development similar to that of L1 varieties and, in this respect at least, demonstrates the convergence of Saipanese English towards them.

**HOWEVER, HOW DO SOCIAL FACTORS CONTRIBUTE TO THE VARIATION OF THE FUTURE TENSE?**

## 4. RESULTS – SOCIAL FACTORS

# Future Tense and Ethnicity

# Future Tense and Sex

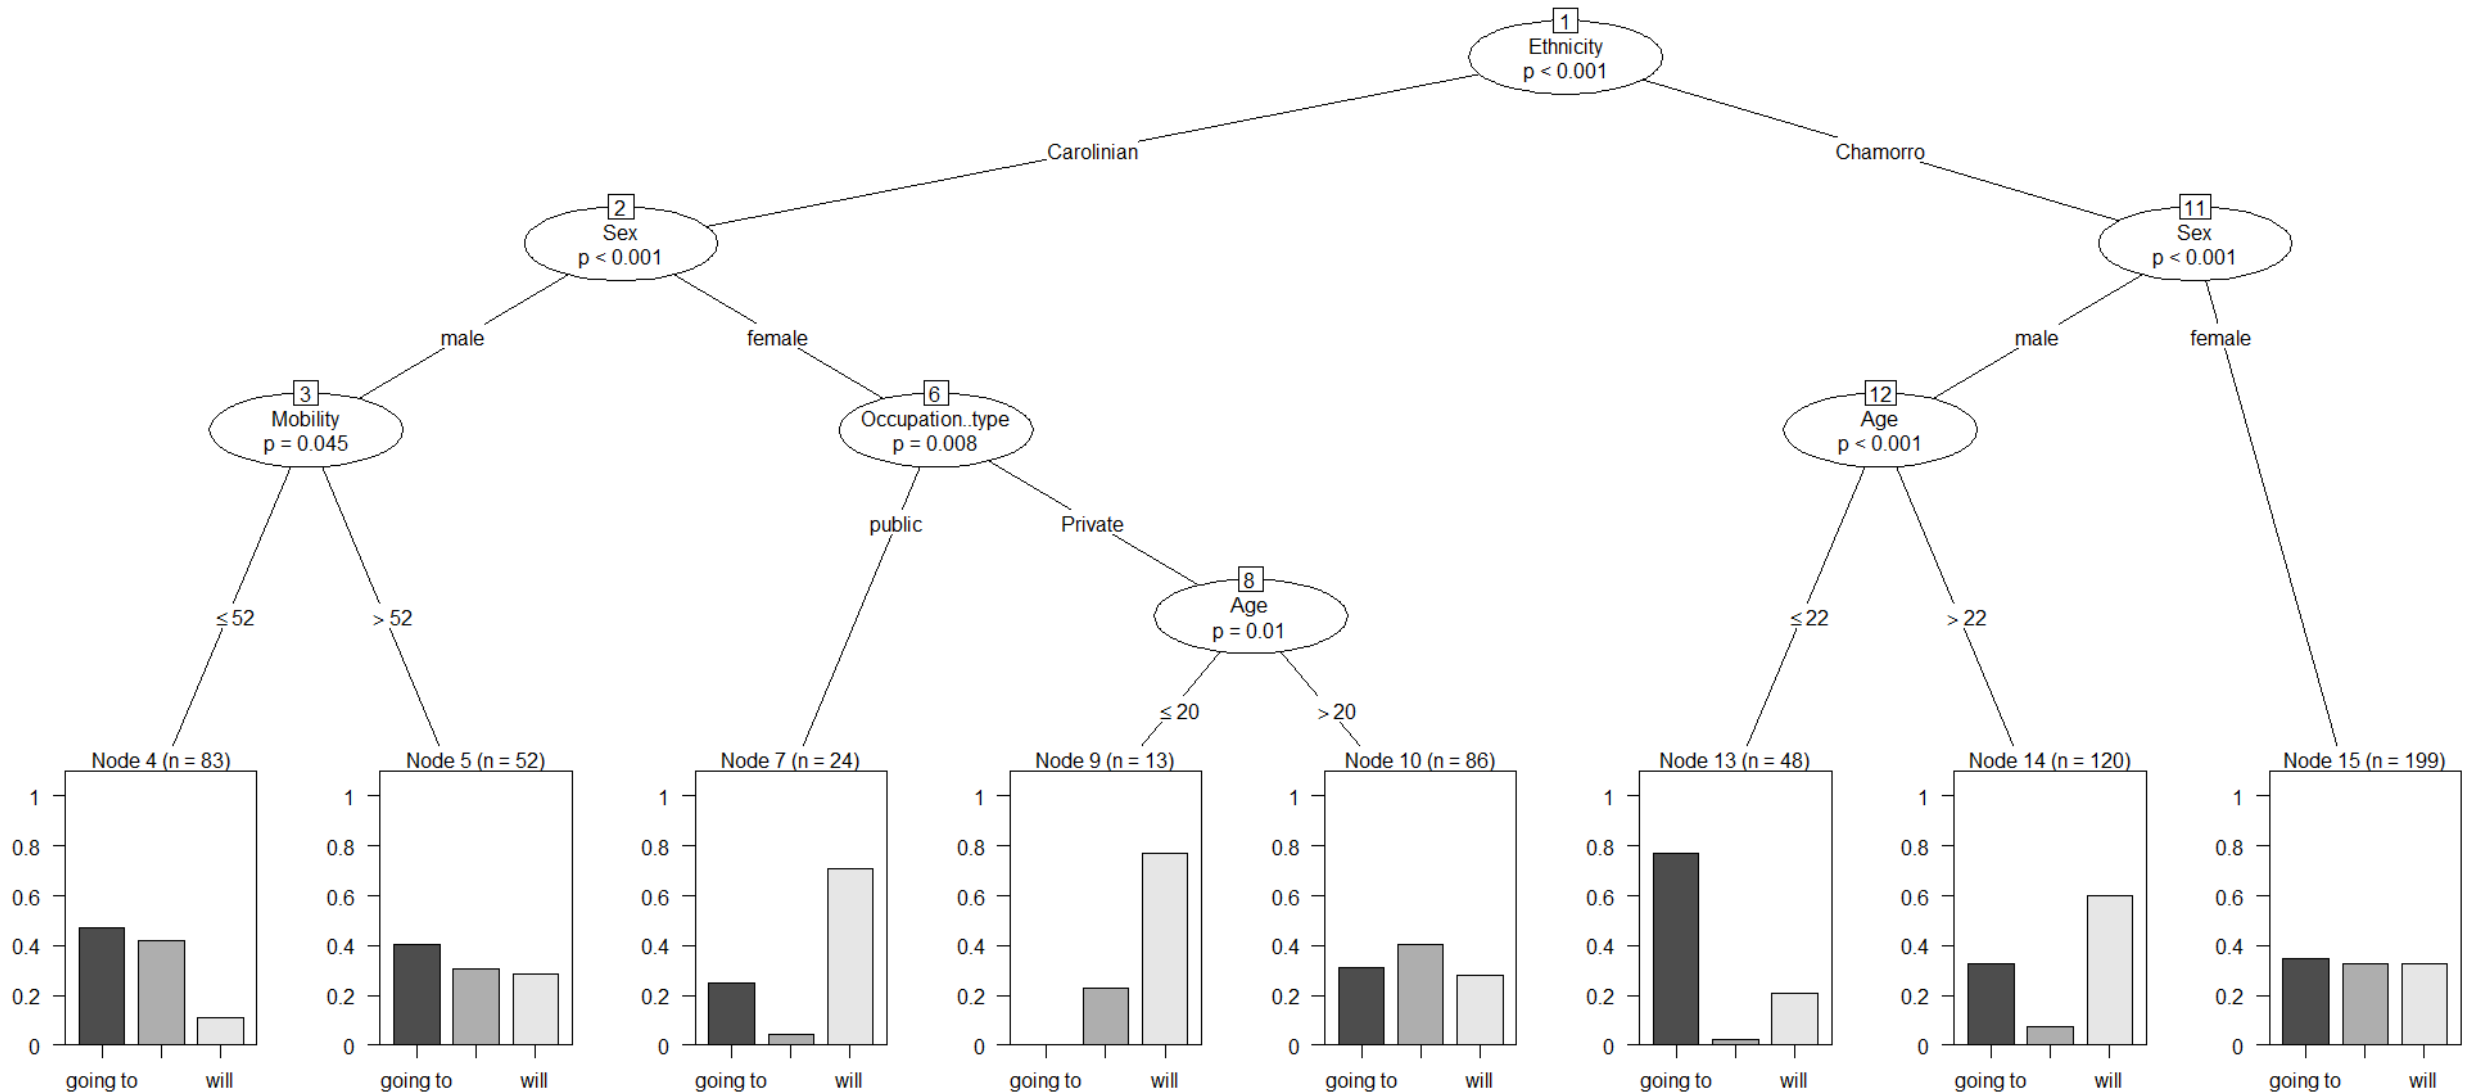

# Future Tense and Age

# Conditional inference tree: Ethnicity + Sex + Age + Mobility + Education Type\*Occupation Type

## 5. CONCLUSION

## INTRALINGUISTIC FACTORS

- Results suggest the same development as other L1 varieties
- Transitivity of verb, IF-clauses, seriality, future implication

## EXTRALINGUISTIC FACTORS

- Results suggest complex interactions of social factors (ethnicity, sex) that contribute to the choice of *will*, *going to* and the futurate present.

Favoring of *will*:

- *female Carolinian speakers*
- *older male Chamorro speakers*

Favoring of *going to*:

- *male speakers*
- *especially young male Chamorro speakers*

Favoring of *futurate present*:

- *Carolinian speakers*
- *(female Chamorro speakers)*

- It seems like Carolinian lag behind the Chamorro in the development of the future tense
- L1, teaching materials, Filipino English, interaction with non-local people
